There are two kinds of closing: **closing for the entire day and closing during the day.**

If Earlville closes **for the entire day**, that decision is made before 7 a.m. The webpage is updated immediately followed by notification to the Emergency Call Center which then alerts the radio and television stations.

If we must close **during the day while school is in session**, a parent phone tree is used to make contact with each student's parents/guardians/emergency contacts.
